School Facilities – Playground Equipment

The Board of Education recognizes that playground equipment is an essential part of a complete school facility. Playgrounds allow children further exploration, in the context of play, to stretch their physical and intellectual abilities, social and emotional skills and to learn some basic principles that can be applied to life in the world. Playgrounds are defined as designated areas where stationary and manipulative play equipment is located to facilitate a child's physical, emotional, social and intellectual development.

All playground equipment, whether purchased by the District or donated by a community or school-related group, must be assessed in terms of suitability for the age level to use the equipment in the school setting and for durability and possible health or safety hazards. Consideration shall also be given to potential hazards when the playground is unsupervised during non-school hours.
