### **Student Services and Diagnostic Counseling**

The Hamden School System will provide professional counseling services to individual students or groups of students who are experiencing difficulties that affect their adjustment to school or interfere with their ability to benefit from their school programs. Counseling services are provided to students to help them understand their own growth and development. Counseling will also be provided to parents to help them understand the educational needs of their children and the developmental issues of childhood.

These counseling services are provided by qualified certified guidance counselors, psychologists and social workers.
