Physical Education

Philosophy

The Board of Education believes that a physical education program should promote a variety of activities that encourage a lifetime commitment to physical fitness and the pursuit of a healthy lifestyle. Emphasis should be placed on total fitness goals needed for the enhancement of the intellectual pursuits and interests of all students, thus giving each child the opportunity to succeed. The physical education program should be based on the concept of providing differentiated instruction for all students. The program should help foster the growth and development of the individual child and provide the basic skills needed to pursue leisure time activities. The physical education program should also include the utilization of current technologies in the field.
